Family Matters @ School for Fathers

This is a hands-on Father and Child workshop where you can create your dream mini garden (terrarium). Through this activity, not only will father and child acquire practical skills of making a terrarium, they will also learn valuable lessons on working together. This terrarium making platform allows the free exchange of ideas, and allows the children to understand its eco-system, and gain insights on how to care and maintain it. The creation of a terrarium also provides a great way of relaxation in the midst of a hectic lifestyle. Families can display their lovely artwork in their home as a reminder of the memorable time they had together.
